

How long did I take the assignment, For me I find it difficult in some ways, maybe because I am not familiar with other syntax I can utilize, I take this exercise atleast 2 hours.

What challenges did I face? Some syntax confusion and designing problem, I find it hard to design when you did not know other syntax. What is my favorite design based on my portfolio, I think the hover effect, because it gives some animation effect when hovering the mouse around some links, and even buttons.
